EMERGENCY POWER GENERATION

About Us

ABT Power Management's **Critical Facility Services** offer a total integration of products, services, and management, eliminating the inconvenience of dealing with multiple vendors and subcontractors.

ABT succeeds at delivering a lower cost of ownership and high return on investment for our clients.

Emergency Power Generation

ABT manages our client's critical power and support systems by providing a reliable line of products and services, reducing costs and exceeding expectations. Our **Emergency Power Generation** services include:

- Comprehensive maintenance on Diesel or NG/LP engines
- Custom maintenance programs per client's requirements
- Vendor supervision and owner representation
- Disaster recovery readiness/assessment programs
- Annual load bank testing to ensure readiness

Infrared Scanning

- Find the exact source of a potential problem before it causes costly equipment failure
- Proactive, preventative, maintenance on any electrical or HVAC equipment
- Clear, concise and accurate reports include repair recommendations/remediation
- Mission critical equipment can be taken off-line under scheduled shut down avoiding costly downtime

Utility and Emergency Switchgear

- Engineer, Furnish and Installation (EF&I)
- Extensive nationwide network of product specialists at your disposal
- Preventative maintenance with monthly or quarterly systems testing
- Automatic Transfer Switch (ATS) testing and calibration
- 7x24x365 emergency response

Diesel Fuel System Management

ABT has been at the forefront of the diesel fuel management field. We have developed proprietary equipment and services to provide our clients with the most reliable stored diesel fuel possible. Our services include:

- Annual management and testing programs
- Certified independent lab analysis
- Remediation and chemical stabilization
- Self-contained equipment - deployable to any location
- Water detection and in-tank elimination
- Client-specific, complete management programs
- Reconditioning and filtration

Analyzing your most critical needs always starts with a site assessment. Contact us to schedule one today.
