UPS SYSTEM ASSESSMENT

About Us

ABT Power Management's **Critical Facility Services** offer a total integration of products, services, and management, eliminating the inconvenience of dealing with multiple vendors and subcontractors.

ABT succeeds at delivering a lower cost of ownership and high return on investment for our clients.

UPS Systems

We offer comprehensive services and a reliable line of products to protect your valuable data. Utilizing factory-trained personnel, your UPS system is tested for proper operation and performance to avoid costly downtime. Our UPS System services include:

- Factory supported system start-up, preventative maintenance and upgrades
- Complete system, parts and service coverage
- Annual, semi-annual or quarterly preventative maintenance and testing to meet your specific needs
- 7x24x365 emergency response and remediation
- Experience with all of the major UPS manufacturers

UPS Batteries

ABT is a Master Stocking Distributor of **EnerSys® HX** UPS batteries in the Carolinas, offering a full range of UPS products to customers in the Southeast. Our battery solutions include:

- Flooded cell battery systems for large kVa (500+) systems
- Sealed (VRLA) top and front terminal batteries
- Battery installation and removal; EPA certified disposal
- Preventative maintenance programs
- Spill containment systems, safety supplies and accessories

Site Assessments

- Detailed site assessment from utility transformer to the branch circuit panels
- Custom designed preventative maintenance programs to meet each client's specific needs
- Implementation of best practices to achieve maximum operational efficiency

Analyzing your most critical needs always starts with a site assessment. Contact us to schedule one today.
