

# CONCENTRICCARE

Planned Maintenance

Planned maintenance is critical to customers whose main focus is to make and ship product at a high level.

ConcentricCare planned maintenance enables manufacturers and distributors to identify **(1)** safety repairs, **(2)** improper charging methods, **(3)** cleanliness issues, and **(4)** low capacity batteries, among other poor maintenance practices.

#### Do you have:

- Aging forklift and battery equipment?
- Pressure to cut costs?
- An on-site trained technician that owns and operates your assets?
- A focus on health & safety?

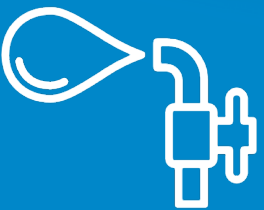

### PREVENTATIVE MAINTENANCE

Inspection of battery, charger cables, and connectors.

Charger testing for safety and accuracy.

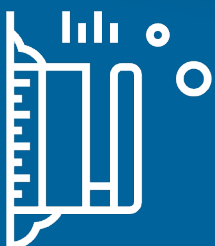

Digitized recommendations at the asset level for further repairs and maintenance.

### BATTERY WATERING

Water battery with watering cart system to ensure optimal watering pressure and volume.

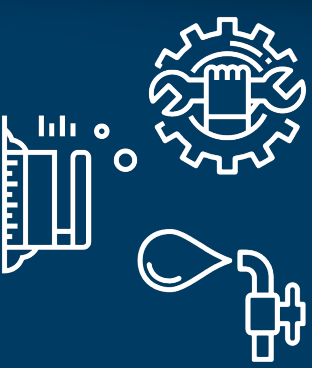

Visually inspect battery for needed repairs.

### BATTERY WASHING

Use of neutralizing agent to remove corrosion and/or escaped acid electrolyte.

Clean exterior of battery inside a recirculating neutralization system.

### CONCENTRICARE

Gain operational clarity, recommended actions for improvement, and charge profile changes as your batteries age.
